

## The Georgia Historical Society Genealogical Vertical File Index

The GHS Genealogical Vertical File Index is a guide to the contents of the Genealogy vertical files maintain by GHS. Vertical files contain newspaper clippings, journal articles, and various published and un-published resources about a particular family/surname. Information on names listed in the index that are in capital letters have individual files. Information on names that do not appear in all capital letters are combined in group folders. Vertical files are accessible in the GHS library and archives reading room.

*See* or *See Also* references are to Subject vertical files or additional genealogical resources in the GHS library and archives reading room.
